

**KIP 700 C Series
Online Technical Differential Training
July 2023**

Dear KIP Authorized Dealer Technicians

Based on the previous successful completion of KIP 600 Series technical training, all KIP Authorized Dealer Technicians are authorized to perform technical service on the new KIP 700 C Series.

However, due to the new features and design enhancements, it is mandatory that KIP Authorized Dealer Technicians review and complete the online Technical Differential review. This online content has been designed to allow KIP 600 Series authorized technicians to successfully install, service and support the new KIP 700 C Series.

Upon your review of all the online content, an online questionnaire must be completed for certification.

After verification of the following items, a certificate of completion will be sent to your main dealer location noting:

- you are a current employee of a KIP Authorized Dealer with a KIP 700 C Series model on order
- you are previously trained on the KIP 600 Series at a KIP location
- 90% on the questionnaire

Please note that you are allowed only one attempt to successfully complete the online questionnaire. As such, please fully review the online documentation and videos prior to completing the questionnaire.

We also encourage you to study the documentation pertaining to the KIP 700 Series as well as System K Software to further familiarize yourself on the newest KIP Systems.

Thank you,
KIP Technical Support Team
